Sandvik Coromant Offers Titanium Milling Seminar for Aerospace Manufacturers

Sandvik Coromant's commitment to domestic manufacturing continues with a 'Smart' event on June 8, 2011 in Fullerton, CA. "Taking Flight: Productive Machining in Titanium" is a one-day seminar where industry-leading specialists will give aerospace manufacturers insight into machining titanium efficiently and cost-effectively.

The seminars will feature technical presentations on the latest application techniques; introductions of new tools and insert grades; troubleshooting tips; in-depth theory; optimization and method comparisons; and live machine demonstrations on features such as pocket milling, facemilling and slotting.

To register for "Taking Flight: Productive Machining in Titanium," please visit <http://www.myyellowcoat.com/events-and-training/smart-events/taking-flight/>.

Sandvik Coromant

Sandvik Coromant is a world-leading supplier of cutting tools and tooling systems for the metalworking industry and is represented in 130 countries. 25 state-of-the art Productivity Centers located around the world provide customers and staff with continuous training in tooling solutions and methods to increase productivity.
